

Checkweighing with ProdX™

The Next Level in Product Safety

Reporting Suite

Standard templates available for audit, compliance and business reports.

Monitoring

of product weights for compliance with packaging legislation.

Automated Recording

Captures all performance monitoring, verification and validation activities automatically.

Data Collection

Centralized collection of all detailed production and inspection values.

Documentation

Easily and efficiently document all corrective and preventive actions (CAPA).

Settings Management

ProdX delivers remote device inspection parameter control.

Simple Visualization

ProdX displays real time production data and device status.

Extend Functionality

Save Time and Money

ProdX software effectively extends the functionality of checkweighing equipment to save you time and money. It automates essential processes including monitoring, reporting and data collation of all product inspection activities in real-time. It is a complete inspection management and connectivity software solution from METTLER TOLEDO.

The safely stored data will help you grow your business by facilitating pre-packaged products regulatory compliance and protecting your brand through proof of due diligence. By analyzing the data, production line improvements can be identified thereby helping to boost productivity and combat rising costs.

Supported Systems

C-Series: C21, C23, C31, C33, C35, CM23, CM31, CM33, CM35, CX31, CX33, CX35, CV35, C12, C16

C-3000: C3x3, C3x7

X-Series: XS, XE, XC

S-Series: 12" screen

Installation Models

Starter Pack – For simple network infrastructures in small sites – Limited to max. 10 devices and 100 users	1 device and 5 users included. • Reject logs • Event log • Counters and statistics • ProdX Monitor • Central data management • Batch
Base Pack – For medium to large network infrastructures as allows direct connection to MES/ERP systems – Limited to max. 200 devices and 3000 users	2 devices and 10 users included. • All above features • Support of Citrix desktop virtualization • Reject image upload • File Export • Email alerts, SMS alerts
Optional Features 100% individual value acquisition OPC UA Server Third party device interface Report Template Designer	(Not available for Starter Pack.) • For big data analysis • Traceability of inspection results to each individual package • Connectivity to an MES/ERP • Use of PackML/Companion Specification tags • Supports Smart Factory (IIoT, Industry 4.0) initiatives • Connectivity to third-party checkweighers through the OPC UA VDMA companion specification • Adapt or extend existing standard template to site-specific reports

SoftwareCare – Keep Your Software Up-to-Date

SoftwareCare gives you peace of mind that ProdX is always up-to-date to meet ever changing compliance, production and IT requirements. It provides quick reaction times from our dedicated software specialists to help ensure optimal system performance at all times.
